Yes

Garbage

He would be in it if not monitored.

Stairs

He only has done the 3 steps up into the house.

Floors

No problems with any surface.

Counters

He surfed initially, but not much as he's settled in.

When is the hound crated?

- 8 Hour Work Day

How does the hound handle being crated?

Hodor goes into his crate very well if there is food or treats involved. Otherwise, I have to help him in. He seems to be very quiet and settled in the crate during the day.

What does the hound enjoy?

Hodor enjoys being with people and playing with toys. He especially like stuffies that have a high-pitched squeak but he will chew holes in them if not monitored. He likes to chew on Bene Bones, preferably ones that have already been started by another dog.

Does the hound have any fears?

Hodor does not seem to have any fears. He's been OK with firecrackers going off outside, not afraid of storms, not afraid of the vacuum.

What type of temperament does the hound have? (Shy, outgoing, confident, etc.)

Hodor is very social with people and loves being loved on by people he knows and also with strangers. He's a very sweet and happy dog. He's wanted to play with the large dogs we've met outside but gets very prey-driven with cats, squirrels, bunnies and small dogs and it takes a lot of effort to get his focus off them. Inside the house, he is very affectionate, inquisitive and is eager to please. He will follow you into whatever room you are in but does not panic if you put up a gate or go down to the basement.

How does the hound handle new situations?

Hodor is confident in new situations, but not overly so and not dominant.

What type of food are you currently using?

Diamond Naturals Beef & Rice

Amount of AM feeding

2 1/2 cups

Amount of PM feeding

2 cups
